

Monitor/Computer

Enable power management settings so they automatically enter a low-power mode when not in use.

I'M NOT ASLEEP OR OFF SO I'M WASTING MONEY

COST
681 computers and 991 monitors like we audited after hours costs HPC **\$37,602** per year compared to **\$24,837** if they are all in sleep mode

SAVINGS
HPC could be saving **\$12,765** per year
