

GBRC ONLINE EDUCATION EVENT
IN PARTNERSHIP WITH USGBC TEXAS

RESIDENTIAL ENERGY DASHBOARD

GUEST SPEAKERS

Patricia Vega
Quantum New Energy

Energy dashboards are beginning to become mainstream in commercial buildings, with residential lagging. This dashboard is off to a great start as it ties to actual usage data from SmartMeterTexas. The idea is that homeowners will choose to manage their energy use more wisely if they have real data presented to them in a coherent fashion. The dashboard indicates comparison graphing from past usage to current along with the change in temperature between the usages. Other screens have other educational energy purposes. Speaker Patricia Vega will outline her process from conception to current day, and explain how the dashboard works in real time.

FREE & OPEN TO THE PUBLIC, CEU AVAILABLE.
