

GBRC ONLINE EDUCATION EVENT  
IN PARTNERSHIP WITH USGBC TEXAS

# USGBC TEXAS BEST PRACTICES APP

## GUEST SPEAKERS

**Nelson Spitz**  
*US Green Building Council Texas  
Chapter*

**David MacLean**  
*US Green Building Council Texas  
Chapter*

The USGBC Texas Best Practices app gives all built environment ecosystem stakeholders equal access to the social, environmental, financial, and emerging equity cost impacts. The democratization of (People, Profit, Planet) benefits or burdens that complex designs, technologies, policies, and processes have on our business and personal lives engages everyone in the quest for better outcomes. This app creates defensible business case substantiation that allows:

- More aggressive advocacy for better buildings and communities .
- Minimum standards to provide the safest, healthiest, most efficient, and most prosperous places to live, learn, work, or play.

We will discuss the full social, environmental, financial, and emerging equity cost benefits and burdens of alternative designs, technologies, policies, and processes to provide a more equitable and just future for all Texans.

**FREE & OPEN TO THE PUBLIC, CEU AVAILABLE.**
