

**GBRC OCTOBER ONLINE EDUCATION EVENT
IN PARTNERSHIP WITH USGBC TEXAS**

PREFAB HOUSING

GUEST SPEAKERS

Rusty and Rame Hruska
Box Prefab

Steve Stelzer,
GBRC Program Director

Pre-fabricated housing is beginning to become mainstream again. Mobile homes have been an industry for a while now, but shipping pre-assembled parts of a conventional house to be configured onsite is catching up. Cost has always been a concern, but the quality advantage is becoming a sales tool now that conventional housing is facing challenges on all fronts. Box Prefab is a Houston-based entity with founders from the design professions who wanted to more tightly hold the quality of the finished product rather than hand that off to a conventional builder. Rame and Russell Hruska will show what they do and how their product is manufactured (with what green building methods), delivered, and installed.

Free & open to the public, CEU available.

Location: ONLINE <https://bit.ly/3qWQLme>
