

Building Code Enforcement Green Building Resource Center

Presents an Education Seminar in partnership with the Texas Chapter of the US Green Building Council

Environmental Social Governance

Changing expectations of business, the new drivers behind the environmental, social, and governance (ESG) revolution, and how companies are responding to demands to increase transparency on their impacts. We decipher the sustainability reporting along the way.

Amanda and David will speak to all current Global, National and Local mandatory regulations, and existing & emerging voluntary standards and certifications; examining Global expectations for International Corporations, like the Sustainable Accounting Board Standard (SASB) and Global Reporting Initiative (GRI), working our way down to requirements to build and operate spaces where occupants can be healthy and productive and everything in between. Sean will speak to all of the above influencers and drivers that led to the decision to build the first LEED v4 Platinum building in Houston. Your chance to understand how each standard, code, initiative and emerging trend ultimately does or does not impact your life (Spoiler: They all do!).

Speakers.....

- Amanda Hsieh**, COO
Global Affairs Associates
- David MacLean**, Reset AP, SASB FSA, LEED AP
President, McMac Cx
- Sean Murphy**, Manager—Development
Skanska USA Commercial Development

Held in the Green Building Resource Center located in the Houston Permitting Center with its LEED Gold Certification since 2012. The GBRC is Houston's best location for seeing displays of green building materials and strategies.
